

PROGRAM OVERVIEW

Iteration 360 Partners with LAU to grow new generation of IT experts

Iteration 360 strongly believes in continued education and professional development of its existing employees. But even beyond this, I360 leaders feel the responsibility to grow and nurture talented students, providing them with a hands-on IT experience and excellent job opportunities for the best candidates after the graduation. That is why we announced our joint partnership with Lebanese American University, in Beirut.

10 students will participate in the program, from both Business emphasis majors and Computer Science major to learn, participate in project deliveries, and build solutions for I360 clients, with a potential job opportunity.

5 Students will be selected from the following majors with Business emphasis and get trained for a functional consultant role.

- Accounting
- Management
- Information Technology Management
- Marketing

The Role of a Functional Consultant

- Display resilience and client-centric value while assisting clients in the implementations and support of their Dynamics 365 solutions
- Work with clients to understand and gather their business requirements and conduct a gap analysis
- Prototype and configure processes in Dynamics 365 solutions in alignment with the client's needs
- Convert requirements to functional specs and functional design documents
- Assist in data migration and testing
- Partner with other consultants to become more engaged with projects based on their size and scope
- Support testing the configured application during Unit Testing and User Acceptance Testing
- Study and pass a Microsoft Business Applications Certification

Preferred Qualifications:

- Exemplify curiosity to further understand clients needs and create solutions
- Passion for learning team with good time management
- Ability to effectively manage complex tasks against a deadline in team settings
- Proficient in Microsoft O365 Applications (Word, Excel, Outlook, Teams, etc.)
- Basic understanding of ERP or CRM systems
- Strong communicator, able to communicate effectively in both spoken and written English

5 Students will be selected from Computer Science major and get trained for a technical consultant role.

The Role of a Technical Consultant

- Delivering services and solutions for Iteration 360 customers as part of Microsoft Power Platform Team using the suite of Microsoft's PowerApps, Power BI, Power Automate Flow, SharePoint, Microsoft Teams, custom development, and data integration on the platform
- Working directly with clients to support various projects and provide solutions
- Developing PowerApps model and canvas-driven apps
- Understand client pain points and troubleshoot as challenges arise
- Installing and configuring data gateways
- Developing Azure logic apps and functions and Power BI development
- Providing architecture, configuration, administration, and functional support to expand capabilities of Microsoft 365
- Designing end-to-end solutions that improve collaboration, productivity, and knowledge sharing
- Identifying areas and processes where Microsoft 365, Office 365, Dynamics 365, and SharePoint can be better leveraged and facilitate process improvement

Preferred Qualifications:

- Understanding of ERP software and how it applies to business process
- Excellent communication skills, written and verbal
- Strong analytical skills
- Knowledge of DevOps - Azure Repos, pipelines, source control, branching, merging (for similar such as Jira or Github)
- Enjoy complex problem-solving, thinking on your feet, and coming up with ingenious solutions
- A go-getter with the ability to juggle multiple tasks and prioritize them
- Understands the value of business analysis for the organization
- A team player working closely with other team members of services delivery
